

R. Stephens Apiarists Pty Ltd

Tasmanian Honey for Honey Connoisseurs

Honey packed on these premises is guaranteed to fulfil over and above the guidelines set out by the industries Quality Control System, namely B'Qual. We are accredited each year.

The honey, namely Golden Bee (Ground Flora) and Golden Nectar Real Leatherwood Honey have records of each batch produced and packaged. We have an independent analysis annually carried out by a very reputable firm (DTS Food Assurance in Melbourne). As well as this, B'Qual and Organic certifiers select a random sample and carry out their own analysis, and all these reports are available for inspection.

It has been the policy of the original owners of this business to not add an extra word, PURE to honey on the label as that word just doubled up on the word HONEY as its reputation depended upon the contents of each jar of HONEY. It is only in recent years that fake honey has reared its ugly head. Rest assured our honey is just that, 100% honey.
